

Policy on Sustainability and the Environment

The **Integra2 Transport Network** dedicates all of its human and technical potential to National Transport overland, by sea and by air.

Being fully aware of the environmental impact that comes from our activity, we want to act while taking care of our surroundings and the welfare of current and future generations.

The **Environmental Sustainability Policy** defined in the current document establishes the frames of reference for the environmental objectives and goals marked by Integra2 in an aim to achieve and provide our clients with a quality service that is safe and sustainable. The principles underpinning this are:

- Compliance with the legal environmental requirements that may be applicable to them.
- Protection of the environment and the implementation of preventative measures and the reduction of contamination in all stages of operation and service, optimising the use of material and energy resources and minimising waste by promoting reuse and recycling.
- Establishment of an adequate and appropriate environmental management system, based on continuous improvement, and which contributes to reducing environmental risks in our whole life cycle.
- Encourage the dissemination and application of good environmental practices among our clients and collaborators, setting up open communication channels for collaborating with them on environmental protection and improvement.
- Promote the training and awareness of our employees and collaborators with regards to the environment via seminars and courses, and encouraging their active participation in environmental initiatives.
- Fight climate change via the control and reduction of our carbon footprint and informing our clients of the impact of their services.

The **Management** would like to convey the importance of the implementation and updating of this policy at every level and post in the company and promises to provide adequate resources in order that it is implemented and carried out, and to monitor its efficiency and effectiveness.

The **Management of Integra2** assumes responsibility for ensuring the dissemination of and compliance with this policy, as well as for revising and updating it whenever required.
